

## Intel® Higher Education Challenge-2017 in Cyber Physical Systems

**Think.... Learn... make and be a part of Intel® Higher Education Challenge-2017 in Cyber Physical Systems.**

Intel invites students to participate in the Intel® Higher Education Challenge 2017, a platform for technical creation around Cyber Physical system. This challenge gives students an opportunity to create and present prototypes around Intel processors and technology at a national level.

The participating students will spend weeks collaborating and be deeply engaged in the challenge through the webinar series on Intel technology, which would successfully enable translate ideas to prototypes.

The first webinar will introduce the participants to the challenge, different phases and important dates. Details are mentioned below:
