Overview

ZestiHub is an online food ordering and delivering system. It is friendly interface and efficient in functioning. Orders can be placed through both an android app and website.

Goals

1. Students should not face problems during exams on making food.
2. Provide healthy and hygienic food at affordable prices.

Description

We as a group of four members developed the app (ZestiHub) in order to avoid the problems of the students who come to pursue undergraduation from different locations. We used different technologies to build the android app and website. App is very quick in response with most friendly user interface. Of course we are very much interested to establish Startups and as a part of Entrepreneurship Cell in our college we took forward this to test in real time. After testing the demand in market we thought of it to make even better in technical aspects. We are working on it to release as soon as possible with best strategies to kick start the services. Now it is off the server so not possible to check in Google Play Store.

Technical Aspects

Technologies Used

1. HTML
2. CSS
3. JavaScript
4. Java
5. Google Maps API for location tracking purpose

App Compatibility

1. Android KitKat and above versions
2. Available in Android Play Store
3. Most of the browsers

Inauguration Day

A promotional banner for Zest Hub. The background is yellow with a black silhouette of a city skyline at the top. A trail of colorful vegetables and food items leads from the left to a silhouette of a person on a motorcycle. The text 'launching' is in large black letters, with '13-02-2017' below it. To the right is the Zest Hub logo, featuring a chef's head and the text 'zest hūb'. Below the logo is the slogan 'TASTE THE BEST' and the website 'www.zestihub.com'. A 'GET IT ON Google Play' logo is in the bottom left corner.
