

Scheme – 2020

Scheme and Syllabus for Minor Program in

Industrial Robotics (IRT)

Offered by Department of Electronics and Communication Engineering

G.PULLA REDDY ENGINEERING COLLEGE (AUTONOMOUS): KURNOOL

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

MINOR DEGREE IN INDUSTRIAL ROBOTICS (IRT)

Scheme of Instruction and Examination

(Effective from 2020-2021)

9		Course Code	Course Title	Credits	Scheme of Instruction periods/week		Scheme of Examination Maximum Marks		
No	Semester				L	T/P	End Exam Assessment	Internal Assessment	Total (100M)

INTRODUCTION TO ROBOTICS (ITR)

Scheme: 2020											
Course Code	Course CodeCategoryHours/WeekCreditsMaximum Marks										
MIR01	РСС	L	T/P	С	Continuous Internal Assessment	End Exam	TOTAL				
		4	0	4	40	60	100				
Sessional E	Sessional Exam Duration: 1 ¹ / ₂ Hrs End Exam Duration: 3 Hrs										
Course Ou	tcomes: At th	ne end of	the course th	ne student v	will be able to						
CO1: Inte	rpret termino	ologies r	elated to Ro	botics tech	nnology.						
CO2: Unde	erstand various	s gripper	s and sensors	s for roboti	cs.						
CO3: Appl	y logic for se	lection c	of robotic sul	o systems	and systems.						
CO4: Anal	yze basics of	principl	es of robot s	ystem inte	egration.						
CO5: Integ	grate knowled	dge of A	I techniques	in the are	a of robotic techno	ology.					
				UNIT-I							
Introduction to robotics : Brief History, Basic Concepts of Robotics such as Definition, Three laws, Elements of Robotic Systems i.e. Robot anatomy, DOF, Misunderstood devices etc., Classification of Robotic systems on the basis of various parameters such as work volume, type of drive, etc., Associated parameters i.e. resolution, accuracy, repeatability, dexterity, compliance, RCC device etc., Introduction to Principles & Strategies of Automation, Types & Levels of Automations, Need of automation Industrial applications of robot											
UNIT-II											
Grippers and Sensors for Robotics: Grippers for Robotics - Types of Grippers, Guidelines for design for robotic gripper, Force analysis for various basic gripper system. Sensors for Robots - Types of Sensors used in Robotics, Classification and applications of sensors, Characteristics of sensing devices, Selections of sensors. Need for sensors and vision system in the working and control of a robot.											
UNIT-III											
Drives and Control for Robotics: Drive - Types of Drives, Types of transmission systems, Actuators and its selection while designing a robot system. Control Systems: Types of Controllers, Introduction to closed loop control.											
UNIT-IV											
Programming and Languages for Robotics : Robot Programming: Methods of robot programming, WAIT, SIGNAL and DELAY commands, subroutines, Programming Languages: Generations of Robotic Languages, Introduction to various types such as VAL, RAIL, AML, Python, ROS etc., Development of languages since WAVE till ROS.											
UNIT-V											
Related Topics in Robotics: Socio-Economic aspect of robotisation. Economical aspects for robot design, Safety for robot and standards, Introduction to Artificial Intelligence, AI techniques, Need and application of AI, New trends & recent updates in robotics.											

Text Books:
1. S. K. Saha, Introduction to Robotics 2e, TATA McGraw Hills Education (2014)
